Sample Book Insights: #1 I had returned from Iraq in 2004, after spending a summer there as the CIA's point person for their Iraq terrorism analysis group in Baghdad. I had volunteered for a temporary duty assignment to Iraq to find signs that Abu Musab al-Zarqawi was still in Iraq. #2 The OSP seemed to utterly disregard the analytic tradecraft that the CIA holds dear. They passed along raw intelligence without context and without explaining the reliability of the source to the White House. #3 In late 2002, the Bush administration pinpointed a new bogeyman to bolster its hegemonic intent: a thirty-six-year-old former drug-dealing street thug from Jordan named Ahmad Fadil al-Nazal al-Khalayleh. He would eventually join al Qaida after the invasion. #4 The president's assertion that Iraq had weapons of mass destruction and was connected to al Qaida was a gross exaggeration. The CIA had determined that Zarqawi's organization didn't know about the 9/11 attacks, much less participate in them. A collection of three plays by Irish playwright Dylan Coburn Gray. Previous Edition: *Electronic Discovery: Law & Practice, Second Edition*, ISBN 9781454815600 **SOLDIER FIVE** is an elite soldier's memoir of his time within the Special Air Service (SAS) and, in particular, his experiences during the Gulf War. As a member of the Special Forces patrol now famously known by its call sign Bravo Two Zero, he and seven others were inserted hundreds of kilometres behind enemy lines. Their mission was to reconnoitre targets, undertake surveillance of Scud missile sites and sabotage Iraqi communications links, but was to end in desperate failure. From the outset the patrol was dogged by problems that contributed both directly and indirectly to the demise of the mission. The patrol's compromise, and subsequent attempts to evade Iraqi troops, resulted in four members of Bravo Two Zero being captured and a further three killed. One escaped. But the story goes further than the Gulf War itself. Despite numerous books, films and articles on the same subject, the British Government has done its utmost to thwart the release of Soldier Five, at one stage claiming the book in its entirety was confidential. A campaign of harassment that took some four-and-a-half years of litigation to resolve has now resulted in this explosive publication. **SOLDIER FIVE** is a gripping and suspenseful account of one man's experiences as a Special Forces soldier. Revealing his conflicts, loyalties and relationships forged, it is the resolution of a soldier's determined fight to see his story told. Since the publication of the successful first edition of *Earthquake Protection* there have been 110 lethal earthquakes, killing 130 000 people; there have also been significant developments in the field of earthquake risk management, particularly in the modelling and analysis of risk for insurance and financial services. Furthermore, major earthquake disasters, such as the 1994 Northridge earthquake in California, the 1995 Kobe earthquake in Japan and the 1999 Kocaeli earthquake in Turkey have occurred. The experience and knowledge gained through these events have improved our understanding of how to manage, mitigate and work towards the prevention of similar catastrophes. The 1990s were in fact the costliest decade on record in terms of disaster management due to such seismic events, placing unprecedented pressure on the insurance industry in particular, and changing its view of earthquake protection. Significantly revised and updated, this second edition continues to provide a comprehensive overview of how to reduce the impact of earthquakes on people and property, and implement best practice in managing the consequences of such disasters. It also includes significant coverage of the techniques of modelling earthquake catastrophe. Each chapter deals with a separate aspect of protection, and covers a wide range of economic and social conditions, drawing on the authors' considerable personal experience and with reference to real life examples. Key features include: Recent event coverage Modern developments in the theory and practice of planning and engineering loss estimation techniques, along with new engineering techniques such as microzonation and hazard-mapping Historic buildings experience An entirely new chapter on 'Earthquakes and Finance' This valuable book provides essential reading for earthquake and structural engineers and geoscientists, as well as insurers and loss prevention specialists, risk managers and assessors involved in managing earthquake risk, urban and regional planners, and emergency management agencies. Explains how college students assume adult responsibilities, and looks at the separation process over four years of college The indexing of Sonoma County newspapers was undertaken to help fill in the gaps in some of the early records in Sonoma County. The first volume, which covers the period from 1854 through 1875 was published early in 2001. Ten additional volumes have been published covering the period through 1918. The present volume contains an index of surnames found in those papers published in Sonoma County between 1919 and 1921 and contains more than 13,900 entries. Some of the entries include residents from the surrounding counties of Marin, Napa, Solano, Lake, and Mendocino. *** 'An astonishing

accomplishment that might be the most important book we ever read, it will change the way you look at what we eat forever.' - Dr Max Pemberton 'A wonderfully written guide for anyone who wants to eat better and save the world at the same time. Essential reading for anyone who cares about the planet.' - Thomasina Miers How changing what you eat can save the planet Our food production systems are the single biggest cause of environmental change, while diseases linked to our eating habits are at epidemic levels and increasing. Enough. uses the latest scientific research to address this vital question: can we provide a growing population with a healthy diet from sustainable food systems? Fortunately for us all, the answer is yes. Enough. shows exactly how we can tackle both of these urgent, interconnected challenges at the same time. Using a seminal piece of research published in 2019, the Planetary HealthDiet (PHD), Dr Coburn reveals the hidden consequences of our food choices, and how we can easily make changes which are better for ourselves and the planet. She details which food groups we should be eating, which we should avoid - and why. Changing our way of eating is something that every one of us has the power to do. Enough. is a clear, ultimately hopeful and hugely important roadmap for both own health - and the planet's. Dervish Dust is the authorized biography of "cool cat" actor James Coburn, covering his career, romances, friendships, and spirituality. Thoroughly researched with unparalleled access to Coburn's friends and family, the book's foundation is his own words in the form of letters, poetry, journals, interviews, and his previously unpublished memoirs, recorded in the months before his passing. Dervish Dust details the life of a Hollywood legend that spanned huge changes in the entertainment and filmmaking industry. Coburn grew up in Compton after his family moved from Nebraska to California during the Great Depression. His acting career began with guest character roles in popular TV series such as The Twilight Zone, Bonanza, and Rawhide. In the 1960s Coburn was cast in supporting roles in such great pictures as The Magnificent Seven, Charade, and The Great Escape, and he became a leading man with the hit Our Man Flint. In 1999 Coburn won an Academy Award for his performance in Affliction. Younger viewers will recognize him as the voice of Henry Waterhouse, the cranky boss in Monsters, Inc., and as Thunder Jack in Snow Dogs. An individualist and deeply thoughtful actor, Coburn speaks candidly about acting, show business, people he liked, and people he didn't, with many behind-the-scenes stories from his work, including beloved classics, intellectually challenging pieces, and less well-known projects. His films helped dismantle the notorious Production Code and usher in today's ratings system. Known for drum circles, playing the gong, and participating in LSD research, Coburn was New Age before it had a name. He brought his motto, Go Bravely On, with him each time he arrived on the set in the final years of his life, when he did some of his best work, garnering the admiration of a whole new generation of fans. When Cassie Coburn moved to London, she never thought she'd be involved in a quadruple homicide. After a car accident ended her medical career before it even started, Cassie moved to London on a whim, expecting to see the sights and live the typical tourist backpacker lifestyle. Instead she finds herself accompanying a French private detective, Violet Despuis, as they attempt to find out who poisoned four people in the middle of London. Cassie's life soon includes this crazy detective, an ancient landlady with a curious past, a mischievous orange cat who likes going for walks on a leash, and a super hot pathologist that Cassie is sure is out of her league. And they haven't even found the murderer yet... The Cassie Coburn mysteries are a cozy mystery series featuring a Sherlock-holmes style sleuth. If you want a light, fun, modern mystery featuring a San Francisco girl totally out of her element in London, and a crazy French woman who happens to be very good at noticing things, then this is the series for you. A register report is one of the clearest and most comprehensive ways to record a family tree - and is certainly far easier to handle than acres of family charts!
