*"Absolutism and Enlightenment" covers the final years of the last great European monarchies and the divestiture of monarchical power through reform and revolution. Emphasis is given to the absolute reign of Louis XIV of France, and the growth of constitutional monarchy in late-17th century England. Enlightenment thinkers, such as Voltaire, Rousseau, and Locke, and their theoretical impact on the unraveling of royal power and the revolutions in France and America are discussed. Challenging review questions encourage meaningful reflection and historical analysis. A unit test and answer key are included. Provides a critical account of one of Europe's most celebrated examples of urban transformation, getting beneath the hype to ask what has really changed in the 'new' Manchester.. The first comprehensive account of contemporary political and economic change in Manchester.. Explores the costs and consequences of making the transition from an industrial to a post-industrial or 'entrepreneurial' city, with broad implications for other major cities. Was there an Irish Revolution, and - if so - what kind of revolution was it? What motivated revolutionaries and those who supported them? How was the war fought and ended? What have been the repercussions for unionists, women and modern Irish politics? These questions are here addressed by leading historians of the period through both detailed assessments of specific incidents and wide-ranging analysis of key themes. The Irish Revolution, 1913-1923 provides the most*

From life at Valley Forge to the end of the war and the drafting of the Articles of Confederation, this packet tracks both the logistical and intellectual dimensions of the "revolution," which, as John Adams said, took place "in the hearts and minds of Americans . . . before a single drop of blood was shed." A close reading of Wikipedia's article on the Egyptian Revolution reveals the complexity inherent in establishing the facts of events as they occur and are relayed to audiences near and far. Wikipedia bills itself as an encyclopedia built on neutrality, authority, and crowd-sourced consensus. Platforms like Google and digital assistants like Siri distribute Wikipedia's facts widely, further burnishing its veneer of impartiality. But as Heather Ford demonstrates in *Writing the Revolution*, the facts that appear on Wikipedia are often the result of protracted power struggles over how data are created and used, how history is written and by whom, and the very definition of facts in a digital age. In *Writing the Revolution*, Ford looks critically at how the Wikipedia article about the 2011 Egyptian Revolution evolved over the course of a decade, both shaping and being shaped by the Revolution as it happened. When data are published in real time, they are subject to an intense battle over their meaning across multiple fronts. Ford answers key questions about how Wikipedia's so-called consensus is arrived at; who has the power to write dominant histories and which knowledges are actively rejected; how these battles play out across the chains of circulation in which data travel; and whether history is now written by algorithms. Life is not exactly a bed of roses for most innovation leaders

*and intrapreneurs—those assertive, innovative, corporate risk-takers who passionately turn ideas into profitable products. They take on corporate sacred cows and face down challenges that would cause less driven and less talented people to quickly throw their hands down in defeat. They struggle daily to unleash entrepreneurial thinking while dealing with an army of people fiercely dedicated to maintaining the status quo. The question for business leaders is simple: How can innovation leaders and intrapreneurs freely operate in a corporation that wants to keep things the way they are? The answer is also simple...Read *The Open Innovation Revolution*. This practical guide reveals that, without the right people to drive innovation processes, your odds of success shrink dramatically. And as open innovation becomes the norm, developing the right people skills—networking, communicating with stakeholders, building your personal brand and the ability to sell ideas—is essential for your innovation leaders and intrapreneurs. Starting with a foreword from world-changing innovator and bestselling author Guy Kawasaki, *The Open Innovation Revolution* looks closely at: Open innovation—the visionary model that more and more companies are adopting Innovation leaders and intrapreneurs—and the essential elements that must be put in place for these people to thrive The people-related roadblocks that can impede innovation and some ways these can be overcome The personal leadership skills you will need to develop as an innovation leader or intrapreneur Written by innovation thought leader Stefan Lindegaard, *The Open Innovation Revolution* helps you know if open innovation is right for your organization, and then shows you how to prepare those within your organization to make the leap into the challenging,*

The Tunisian revolution raises important questions regarding the articulation of resistance and political subjectivity in the context of global governmentality. By drawing from political theory, philosophy, ethnography and readings of local street art, this book restores the radical significance of the political event as an instance of possible collective action. Using the 2011 Tunisian revolution as a starting point for a broader discussion,

*this book analyses the processes of Orientalisation of non-Western examples of collective action and critiquing the narrative frame of the 'Arab Spring'. By focusing on the aspect of autonomous mobilities and transformations, occurred within a beyond the Tunisian space, Oana Pârvan is able answer key questions including, how moments of political rupture (such as revolutions) are interpreted by the wider public and how mobility across the Mediterranean rearticulates the distribution and recomposition of political theory categories such as class. She narrates how the Tunisian revolution can be inscribed into a long history of dispossession (colonial, regional, neoliberal) and resistance; and the culture and practices of the Tunisian revolutionaries have spread in the country and abroad (seen as a way to think beyond the methodological framework of the nation-state). This work builds on research fieldwork and the analysis of Tunisian street art (mostly of the Ahl Al Kahf collective), drawing from migration-centred ethnographic work in order to suggest a reconstruction of the event. By applying theoretical reflections inspired by continental philosophy, media theory and autonomy of migration theory, this work develops an event-based theoretical reflection able to contribute towards rethinking contemporary Orientalism, self-representation and political subjectivity. Why did the industrial revolution take place in eighteenth-century Britain and not elsewhere in Europe or Asia? In this convincing new account Robert Allen argues that the British industrial revolution was a successful response to the global economy of the seventeenth and eighteenth centuries. He shows that in Britain wages were high and capital and*

*energy cheap in comparison to other countries in Europe and Asia. As a result, the breakthrough technologies of the industrial revolution - the steam engine, the cotton mill, and the substitution of coal for wood in metal production - were uniquely profitable to invent and use in Britain. The high wage economy of pre-industrial Britain also fostered industrial development since more people could afford schooling and apprenticeships. It was only when British engineers made these new technologies more cost-effective during the nineteenth century that the industrial revolution would spread around the world.
