On God's Existence Dec 19 2019 Philosophy and the advances in cosmology, neurology, molecular biology, and the social sciences have made the convincing and converging arguments for God's existence more probable than ever in history. *On God's Existence* is concise summary of these arguments as well as new arguments inspired by the advances of the sciences.

Ecology and Conservation of Birds in Urban Environments Dec 23 2022 This book provides syntheses of ecological theories and overarching patterns of urban bird ecology that have only recently become available. The numerous habitats represented in this book ranges from rows of trees in wooded alleys, to wastelands and remnants of natural habitats encapsulated in the urban matrix. Authored by leading scientists in this emergent field, the chapters explore how the characteristics of the habitat in urban environments influence bird communities and populations at multiple levels of ecological organization and at different spatial and temporal scales, and how this information should be incorporated in urban planning to achieve an effective conservation of bird fauna in urban environments. Birds are among the most conspicuous and fascinating residents of urban neighborhoods and provide urban citizens with everyday wildlife contact all over the world. However, present urbanization trends are rapidly depleting their habitats, and thus knowledge of urban bird ecology is urgently needed if birds are to thrive in cities. The book is unique in its inclusion of examples from all continents (except Antarctica) in an effort to arrive at a more holistic perspective. Among other issues, the individual chapters address the censusing of birds in urban green spaces; the relationship between bird communities and the structure of urban green spaces; the role of exotic plant species as food sources for urban bird fauna; the influence of artificial light and pollutants on bird fauna; trends in long-term urban bird research, and transdisciplinary studies on bird sounds and their effects on humans. Several chapters investigate how our current knowledge of the ecology of urban bird fauna should be applied in order to achieve better management of urban habitats so as to achieve conservation of species or even increase species diversity. The book also provides a forward-looking summary on potential research directions. As such, it provides a valuable resource for urban ecologists, urban ecology students, landscape architects, city planners, decision makers and anyone with an interest in urban ornithology and bird conservation. Moreover, it provides a comprehensive overview for researchers in the fields of ecology and conservation of urban bird fauna.

Wildlife Habitat Conservation Jun 17 2022 Published in association with The Wildlife Society.

Mirrors of Self Sep 20 2022 Orthodox Christology maintains that Jesus Christ is both truly God and truly human. As such, he is the key to knowing both God and self. In a series of applications of christological anthropology, *Mirrors of Self* develops this epistemic

premise in dialogue with a diversity of Christian and secular, historical and modern perspectives. Aspects of human personhood, including the ever-elusive self, gain greater clarity and significance in the light of Christ's person and work. At the center of individual human subjectivity, we encounter a broken, sin-blinded self in need of renewal and release. What healing we find comes to us as Christ's ecological presence works in and through others—the mirrors of self whose instrumental agency Christ employs in service to his own redemptive ends.

Sustaining Young Forest Communities Jan 12 2022 This edited volume addresses a rising concern among natural resource scientists and management professionals about decline of the many plant and animal species associated with early-successional habitats, especially within the Central Hardwood Region of the USA. These open habitats, with herbaceous, shrub, or young forest cover, are disappearing as abandoned farmland, pastures, and cleared forest patches return to forest. There are many questions about “why, what, where, and how” to manage for early successional habitats. In this book, expert scientists and experienced land managers synthesize knowledge and original scientific work to address questions on such topics as wildlife, water, carbon sequestration, natural versus managed disturbance, future scenarios, and sustainable creation and management of early successional habitat in a landscape context.

Is Reality Secular? Jul 26 2020 What is the nature of reality? What does it mean to be human? And how do we account for ethics and morality? Mary Poplin examines naturalism, humanism, pantheism and Judeo-Christian theism and explores the fundamental assumptions and limitations of each perspective.

Postmodern Picturebooks Feb 19 2020 Over the past 15 years, there has been a pronounced trend toward a particular type of picturebook that many would label "postmodern." Postmodern picturebooks have stretched our conventional notion of what constitutes a picturebook, as well as what it means to be an engaged reader of these texts. The international researchers and scholars included in this compelling collection of work critically examine and discuss postmodern picturebooks, and reflect upon their unique contributions to both the field of children's literature and to the development of new literacies for child, adolescent, and adult readers.

Empathy Apr 22 2020 Examines the importance of empathy in a wide range of disciplines including ethics, aesthetics, and psychology.

Cutting-Edge Organic Synthesis and Chemical Biology of Bioactive Molecules Aug 27 2020 This book describes cutting-edge organic syntheses of biologically active compounds, isolation of pharmaceutically promising compounds from microorganisms, drug design, and progress on chemical biology. Synthetic strategy and tactics are summarized for super-carbon chain compounds, antitumor polycycles, aryl C-glycoside, antimycins, duocarmycins, cannabinoids, and other compounds. Special chapters are devoted to synthesis and biochemistry of fatty acid metabolites, which play a central role in the initiation and resolution of inflammation. The book provides a quick survey of trending topics in organic synthesis and chemical tools for biological investigation, and furnishes ideas for future research in organic synthesis. In addition, the contents can easily be understood by young chemists, graduate students, and those who are looking for new research based on organic chemistry.

Chemical Synthesis of Nucleoside Analogues Oct 09 2021 Compiles current tested and proven approaches to synthesize novel

nucleoside analogues Featuring contributions from leading synthetic chemists from around the world, this book brings together and describes tested and proven approaches for the chemical synthesis of common families of nucleoside analogues. Readers will learn to create new nucleoside analogues with desired therapeutic properties by using a variety of methods to chemically modify natural nucleosides, including: Changes to the heterocyclic base Modification of substituents at the sugar ring Replacement of the furanose ring by a different carbo- or heterocyclic ring Introduction of conformational restrictions Synthesis of enantiomers Preparation of hydrolytically stable C-nucleosides Chemical Synthesis of Nucleoside Analogues covers all the major classes of nucleosides, including pronucleotides, C-nucleosides, carbanucleosides, and PNA monomers which have shown great promise as starting points for the synthesis of nucleoside analogues. The book also includes experimental procedures for key reactions related to the synthesis of nucleoside analogues, providing a valuable tool for the preparation of a number of different compounds. Throughout the book, chemical schemes and figures help readers better understand the chemical structures of nucleoside analogues and the methods used to synthesize them. Extensive references serve as a gateway to the growing body of original research studies and reviews in the field. Synthetically modified nucleosides have proven their value as therapeutic drugs, in particular as antiviral and antitumor agents. However, many of these nucleoside analogues have undesirable side effects. With *Chemical Synthesis of Nucleoside Analogues* as their guide, researchers have a new tool for synthesizing a new generation of nucleoside analogues that can be used as therapeutic drugs with fewer unwanted side effects.

Autocar Oct 29 2020

Clean Energy Systems and Experiences Jan 20 2020 This book reports the latest developments and trends in "clean energy systems and experiences". The contributors to each chapter are energy scientists and engineers with strong expertise in their respective fields. This book offers a forum for exchanging state of the art scientific information and knowledge. As a whole, the studies presented here reveal important new directions toward the realization of a sustainable society.

Civil Society and Participatory Governance Oct 21 2022 Breaks new ground in the study of participatory governance by combining qualitative and quantitative research methods. Donaghy uses data from Brazil's 5,564 municipalities and fieldwork from five Brazilian cities to test whether participatory municipal housing councils are associated with an increase in adoption of social housing programs to benefit the poor.

Theology, Ethics and Transcendence in Sports Jul 06 2021 This book provides an inter-disciplinary examination of the relationship between sport, spirituality and religion. It covers a wide-range of topics, such as prayer and sport, religious and spiritual perspectives on athletic identity and 'flow' in sport, theological analysis of genetic performance enhancement technologies, sectarianism in Scottish football, a spiritual understanding of sport psychology consultancy in English premier league soccer and how Zen may be useful in sports performance and participation. As modern sport is often intertwined with commercial and political agendas, this book also provides an important corrective to the "win at all costs" culture of modern sport, which cannot always be fully understood through secular ethical

inquiry. This is a unique and important addition to the current literature for a wide-range of fields including theology and religious studies, psychology, health studies, ethics and sports studies.

The Avian Migrant Nov 29 2020 "John H. Rappole's sophisticated survey of field data clarifies key ecological, biological, physiological, navigational, and evolutionary concerns"--Publisher.

The Therapeutic Powers of Play Apr 15 2022 "Focusing on the specific ingredients that activate clinical change, this book is enhanced by current research, more ample scope, and an array of contributions in contemporary and relevant topic areas. It is full of inspiration, direction, and grounding. This is a stunning contribution to the field of child therapy." —Eliana Gil, PhD, Gil Institute for Trauma Recovery and Education A practical look at how play therapy can promote mental health wellness in children and adolescents Revised and expanded, *The Therapeutic Powers of Play, Second Edition* explores the powerful effects that play therapy has on different areas within a child or adolescent's life: communication, emotion regulation, relationship enhancement, and personal strengths. Editors Charles Schaefer and Athena Drewes—renowned experts in the field of play therapy—discuss the different interventions and components of treatment that can move clients to change. Leading play therapists contributed to this volume, supplying a wide repertoire of practical techniques and applications in each chapter for use in clinical practice, including: Direct teaching Indirect teaching Self-expression Relationship enhancement Attachment formation Catharsis Stress inoculation Creative problem solving Self-esteem Filled with clinical case vignettes from various theoretical viewpoints, the second edition is an invaluable resource for play and child therapists of all levels of experience and theoretical orientations.

Loving God with Family Life Dec 11 2021 **LOVING GOD.** God is Lord and Creator of all. We belong to Him. Therefore, we must love Him wholeheartedly and with all our strength. With family life. God has created children and adults to live together in families, and He calls us to love Him with all of family life. Great blessing awaits families who love God with all of family life. God calls families to Himself and gives the strength to love Him fully. This book helps us to discover God's reality in the family. It is a practical guide for family life, with the love of God at the center. It is written with fathers in mind but can be read by everybody.

The Theory and Practice of Christian Psychology in Europe Sep 08 2021 A view of human nature generally undergirds approaches to mental health and flourishing. Spirituality is accepted by most cultures as an integral part of human nature and cannot be ignored when attempting to take care of our suffering and promoting flourishing. The onset of the COVID-19 pandemic in December 2019 caused worldwide shock and ripped at the very fabric of society. Everybody was affected by the threat of the illness and loss of lives. The disastrous economic impact is still felt in many parts of the world. In this book, a combination of Christian faith and scientific knowledge is presented as an answer to the question of human suffering. Individual and collective suffering are addressed by various articles and therapeutic models. The book further serves to deepen understanding of the value of spiritual knowledge and insight in therapy for both Christian and non-Christian therapists, in respect of both theory and practice. The content covers a wide range of topics, including collective suffering, individual suffering due to abuse, elements of Christian psychotherapy, the role of conscience

and faith in healing, spiritual maturity, and a Christian view of identity in a digital age.

Hume on the Self and Personal Identity Mar 22 2020 This book brings together a team of international scholars to attempt to understand David Hume's conception of the self. The standard interpretation is that he holds a no-self view: we are just bundles of conscious experiences, thoughts and emotions. There is nothing deeper to us, no core, no essence, no soul. In the Appendix to A Treatise of Human Nature, though, Hume admits to being dissatisfied with such an account and Part One of this book explores why this might be so. Part Two turns to Books 2 and 3 of the Treatise, where Hume moves away from the 'fiction' of a simple self, to the complex idea we have of our flesh and blood selves, those with emotional lives, practical goals, and social relations with others. In Part Three connections are traced between Hume and Madhyamaka Buddhism, Husserl and the phenomenological tradition, and contemporary cognitive science.

Christian Principles for the Practice of Counseling and Psychotherapy Sep 27 2020 All approaches to counseling and psychotherapy rest on assumptions about human nature. Current theories are primarily derived from Buddhist, humanistic, and evolutionary perspectives where there is no God or faith. This book mines the riches of scripture to identify the dimensions of human nature as understood in the Christian faith that can illuminate the work of the practicing clinician. These dimensions of human nature serve as a scaffolding that organize the scientific findings from psychology and neuroscience while remaining attentive to the spirituality of the client. A neuro-psycho-spiritual approach takes a whole-person perspective, delving into the psychological, neurobiological, and spiritual layers of human experience that are relevant to clinical practice. The counselor and psychotherapist will learn how to utilize the dimensions of human nature found in the Bible and apply them to their clinical work through the treatment of Joe, a priest struggling with a sex addiction. Joe will serve as a guide to illustrate how Christian principles can serve as a roadmap to better understand how emotional healing can be facilitated.

Growth Versus Security Feb 01 2021 EU members strive for an economic and social policy model which incorporates a set of common values while maintaining economic competitiveness. This book explores how new members look to the US model, and how older members use other's experiences to reshape their own economies.

Human Rights and Ethics: Concepts, Methodologies, Tools, and Applications Jul 18 2022 In today's increasingly interconnected and global society, the protection of basic liberties is an important consideration in public policy and international relations. Profitable social interactions can begin only when a foundation of trust has been laid between two parties. Human Rights and Ethics: Concepts, Methodologies, Tools, and Applications considers some of the most important issues in the ethics of human interaction, whether in business, politics, or science and technology. Covering issues such as cybercrime, bioethics, medical care, and corporate leadership, this four-volume reference work will serve as a crucial resource for leaders, innovators, educators, and other personnel living and working in the modern world.

Developing Self in Work and Career May 04 2021 Human beings possess the unique psychological ability to self-reflect. Few human

experiences and behaviors define the self and allow us to characterize ourselves within the social world more than work and career. The pressing economic and social conditions of the information and globalization age require workers to be more self-directed by managing their own work lives, rather than solely relying on organizations to support them. Given these shifting occupational structures, it is time to reassess the long-standing emphasis on fitting workers to jobs and move toward empowering them to adapt to change. In this volume, leading scholars and practitioners examine the construct of self through vocational psychology and career development topics centered on theory, assessment, and intervention. Chapters in Part I consider predominant theoretical models of career choice and development, such as person–environment fit, developmental, sociocognitive–behavioral, and constructionist perspectives. In Part II, contributors offer counseling methods rooted in these theoretical models and in contemporary I/O psychology to foster self-construction through work and career. In the final part, authors examine contextual dimensions of gender, culture, and socioeconomic class to investigate how self is constructed in relation to our social world. By exploring theories of career choice and development and their related counseling practices, practitioners can more effectively meet the needs of a rapidly changing global workforce.

Reading Hume on the Principles of Morals Nov 10 2021 Hume's Enquiry concerning the Principles of Morals is one of the landmark works in the history of moral philosophy; this volume presents a section-by-section study of the work in the form of new interpretative essays by leading Hume scholars. The result is a comprehensive reassessment of Hume's 'recasting' of his moral philosophy in this work. Particular attention is given to the Enlightenment concepts of justice and benevolence, as well as to the concept of humanity and moral sentiment. Fifteen original chapters take the reader through the nine sections and four appendices of Hume's Enquiry, as well as 'A Dialogue, ' to assess critically the moral philosophy he presents. How does it differ from the moral philosophy of the Treatise, and how should we understand the significance of the arguments he advances? Additional chapters examine the relation between Hume's mature moral philosophy and related subjects such as his epistemology, his writings on religion, beauty and criticism, the passions, and his own intellectual and philosophical development during the period in which he conceived and wrote the Enquiry.

Annual Report Dec 31 2020

Making Meaning Nov 22 2022 This integrative book brings forty years of research and scholarship in counseling, psychology, and education together in a singular analysis. In *Making Meaning*, Hayes illustrates how the construction of meaning can have a profound effect on how we come to know ourselves and others. Hayes depicts meaning-making as an ongoing, dialectical, and recursive process of change and reinvention. This process plays a central role in individual development and loss and helps promote multiculturalism, collaboration, and group and team development. This book is recommended for mental health professionals and educators looking to promote democratic learning communities.

The Shadow of the Second Mother Oct 17 2019 *The Shadow of the "Second Mother"* explores why there has been such little interest, in psychology, social history and biography, in the important contribution that 'second mothers', such as wet nurses and nannies, have

had upon the emotional life of the children they have nursed. For the last three thousand years and throughout most civilisations they have nurtured the children of the privileged, and kept alive the abandoned and unwanted child, and yet there has been a profound silence surrounding the influence they may have had. The author explores the lives of several well-known people who have been wet nursed, such as Michelangelo, Rousseau, Jack London, Nabokov and Klein. She speculates that they all were affected emotionally by their 'second mother', and concludes that a universal feature of such delegated mothering seems to be that the bond between mother and child is broken, and the child may be left with a life-long distrust of close relationships. In *The Shadow of the "Second Mother"*, Coles combines an exploration of attachment theory with neurology, making it possible to give an explanation as to why these important figures have lain unnamed and ignored in our social and psychological consciousness. This intriguing new approach to an ancient practice will be fascinating reading for psychotherapists, psychoanalysts, sociologists and students of social history.

The Construction of the Self, Second Edition Feb 25 2023 An important work from a leading scholar, this book explores self-development from early childhood to adulthood. Susan Harter traces the normative stages that define the emergence of many self-processes, including self-esteem. She also addresses individual differences and societal influences on self-development. Presenting pioneering empirical research, Harter shows that increasingly mature features of the self have both benefits and liabilities for psychological adjustment. The book highlights the causes and consequences of different types of self-representations, including those that are unrealistically negative or positive. **New to This Edition** *Reflects more than a decade of conceptual, empirical, and methodological advances. *Provides a broader sociocultural framework for understanding self-development. *Chapters on emerging adulthood, self-esteem and physical appearance, self-processes in the classroom, motivation, cross-cultural issues, and the quest for authenticity. *Expanded chapters on childhood, adolescence, and the self-conscious emotions. *Increased attention to the liabilities of our contemporary preoccupation with the self.

Musical Portraits Jun 05 2021 Joshua S. Walden's *Musical Portraits: The Composition of Identity in Contemporary and Experimental Music* explores the wide-ranging but under-examined genre of musical portraiture. It focuses in particular on contemporary and experimental music created between 1945 and the present day, an era in which conceptions of identity have changed alongside increasing innovation in musical composition as well as in the uses of abstraction, mixed media, and other novel techniques in the field of visual portraiture. In the absence of physical likeness, an element typical of portraiture that cannot be depicted in sound, composers have experimented with methods of constructing other attributes of identity in music, such as character, biography, and profession. By studying musical portraits of painters, authors, and modern celebrities, in addition to composers' self-portraits, the book considers how representational and interpretive processes overlap and differ between music and other art forms, as well as how music is used in the depiction of human identities. Examining a range of musical portraits by composers including Peter Ablinger, Pierre Boulez, Morton Feldman, Philip Glass, György Ligeti, and Virgil Thomson, and director Robert Wilson's on-going series of video portraits of modern-day celebrities and his "portrait opera" *Einstein on the Beach*, *Musical Portraits* contributes to the study of music since 1945 through a

detailed examination of contemporary understandings of music's capacity to depict identity, and of the intersections between music, literature, theater, film, and the visual arts.

Battery-less NFC Sensors for the Internet of Things Mar 14 2022 The implementation of near-field communication (NFC) technology in smartphones has grown rapidly, especially due to the use of this technology as a payment system. In addition, the ability to use the energy transmitted not only for communication, but also for feeding other devices, which together with the low cost of NFC chips and the internet connectivity of the smartphones, allows the design of battery-less RF tags with sensing capabilities, whose information can be sent to the cloud. This is of great interest in the increasing amount of IoT (Internet of Things) scenarios. This book studies the feasibility of these sensors, analyzing the different parameters that have an influence on performance and in the range of operation. It also presents techniques to increase the range and analyzes the effects of certain materials when they are close to the antenna. The design and analysis of several sensors that can be powered and read by any NFC enabled device are presented in this work.

Toward Mutual Recognition Jun 24 2020 Ever since its nascent days, psychoanalysis has enjoyed an uneasy coexistence with religion. However, in recent decades, many analysts have been more interested in the healing potential of both psychoanalytic and religious experience and have explored how their respective narrative underpinnings may be remarkably similar. In *Toward Mutual Recognition*, Marie T. Hoffman takes just such an approach. Coming from a Christian perspective, she suggests that the current relational turn in psychoanalysis has been influenced by numerous theorists - analysts and philosophers alike - who were themselves shaped by an embedded Christian narrative. As a result, the redemptive concepts of incarnation, crucifixion, and resurrection - central to the tenets of Christianity - can be traced to relational theories, emerging analogously in the transformative process of mutual recognition in the concepts of identification, surrender, and gratitude, a trilogy which she develops as forming the "path of recognition." Each movement on this path of recognition is given thought-provoking, in-depth attention. Chapters dedicated to theoretical perspectives utilize the thinking of Benjamin, Hegel, and Ricoeur. In her historical perspectives, she explores the personal and professional histories of analysts such as Sullivan, Fairbairn, Winnicott, Erikson, Kohut, and Ferenczi, among others, who were influenced by the Christian narrative. Uniting it all together is the clinical perspective offered in the compelling extended case history of Mandy, a young lady whose treatment embodies and exemplifies each of the steps along the path of growth in both the psychoanalytic and Christian senses. Throughout, a relational sensibility is deployed as a cooperative counterpart to the Christian narrative, working both as a consilient dialogue and a vehicle for further integrative exploration. As a result, the specter of psychoanalysis and religion as mutually exclusive gives way to the hope and redemption offered by their mutual recognition.

Bulletin bibliographique de la Société internationale arthurienne Mar 02 2021

Neuroscience and Media Nov 17 2019 This volume explores how advances in the fields of evolutionary neuroscience and cognitive psychology are informing media studies with a better understanding of how humans perceive, think and experience emotion within mediated environments. The book highlights interdisciplinary and transdisciplinary approaches to the production and reception of

cinema, television, the Internet and other forms of mediated communication that take into account new understandings of how the embodied brain senses and interacts with its symbolic environment. Moreover, as popular media shape perceptions of the promises and limits of brain science, contributors also examine the representation of neuroscience and cognitive psychology within mediated culture.

Society and Law Jan 24 2023 Law is a discipline deeply affected by development and adjustment. Standards are neither made nor connected in a vacuum, and are re-adjusted and utilized for a number of specific reasons. Law and society are deeply connected with each other: society resembles the wilderness without the application of law, while law is characterised by the society in which it is implemented. The relationship between authoritative legal documents and social science has been increasingly investigated within recent years, with collaboration between researchers from the humanities, sociology, and legal disciplines, destabilizing and re-conceptualizing ways of discussing legal issues. This ever-expanding corpus of work has explored an assortment of issues, from ideas of uniformity and secularism to histories of provincial law, and from women's activist engagements with the law to the relationship between law and the media. This book investigates a range of hypothetical issues concerning the relationship between law and society and how it plays out, specifically in fields of legitimacy and social strategy at both residential and universal levels. This will allow the reader to comprehend the hidden standards and ideas in socio-legal reviews. The central questions here are: What effect does law have on our lives? To what extent does law either control what we do or permit us to accomplish what we need? Is law indistinguishable from equity? The book will appeal to anyone working in government, general affiliations, legal firms and consultancies, and legal scholars.

The Politics of Panem Feb 13 2022 The Hunger Games trilogy is a popular culture success. Embraced by adults as well as adolescents, Suzanne Collins's bestselling books have inspired an equally popular film franchise. But what, if anything, can reading the Hunger Games tell us about what it means to be human in the world today? What complex social and political issues does the trilogy invite readers to explore? Does it merely entertain, or does it also instruct? Bringing together scholars in literacy education and the humanities, *The Politics of Panem: Challenging Genres* examines how the Hunger Games books and films, when approached from the standpoint of theory, can challenge readers and viewers intellectually. At the same time, by subjecting Collins's trilogy to literary criticism, this collection of essays challenges its complexity as an example of dystopian literature for adolescents. How can applying philosophic frameworks such as those attributable to Socrates and Foucault to the Hunger Games trilogy deepen our appreciation for the issues it raises? What, if anything, can we learn from considering fan responses to the Hunger Games? How might adapting the trilogy for film complicate its ability to engage in sharp-edged social criticism? By exploring these and other questions, *The Politics of Panem: Challenging Genres* invites teachers, students, and fans of the Hunger Games to consider how Collins's trilogy, as a representative of young adult dystopian fiction, functions as a complex narrative. In doing so, it highlights questions and issues that lend themselves to critical exploration in secondary and college classrooms.

Economics as Religion May 24 2020 Robert Nelson's *Reaching for Heaven on Earth, Economics as Religion, and The New Holy*

Wars: Economic Religion Versus Environmental Religion in Contemporary America read almost like a trilogy, exploring and charting the boundaries of theology and economics from the Western foundations of ancient Greece through the traditions that Nelson identifies as “Protestant” and “Roman,” and on into modern economic forms such as Marxism and capitalism, as well as environmentalism. Nelson argues that economics can be a genuine form of religion and that it should inform our understanding of the religious developments of our times. This edition of Economics as Religion situates the influence of his work in the scholarly economic and theological conversations of today and reflects on the state of the economics profession and the potential implications for theology, economics, and other social sciences.

Well-Being and Cultures Aug 07 2021 This anthology focuses on empirical studies comparing cultures in relation to central positive psychological topics. The book starts out with an introductory chapter that brings together the main ideas and findings within an integrative perspective, based on a broad theoretical framework encompassing interdisciplinary and methodological issues. It gives special emphasis to some open issues in the theory and assessment of culture-related dimensions, and to the potential of positive psychology in addressing them. The introductory chapter is followed by two chapters that examine theoretical approaches and instruments developed to assess happiness and well-being across cultures. Following that examination, five chapters are devoted to the relationship between well-being, cultures and values. The second half of the book prominently investigates well-being across cultures in the light of socio-economic factors. This book shows that positive psychology, now officially well into its second decade, is providing still finer-grained perspectives on the diversity of cultures along with insights about our shared human nature, uniting us for better or worse.?

New Holy Wars Apr 03 2021

Anglo-Saxon Manuscripts May 16 2022 Anglo-Saxon Manuscripts is the first publication to list every surviving manuscript or manuscript fragment written in Anglo-Saxon England between the seventh and the eleventh centuries or imported into the country during that time. Each of the 1,291 entries in Helmut Gneuss and Michael Lapidge's Bibliographical Handlist not only details the origins, contents, current location, script, and decoration of the manuscript, but also provides bibliographic entries that list facsimiles, editions, linguistic analyses, and general studies relevant to that manuscript. A general bibliography, designed to provide full details of author-date references cited in the individual entries, includes more than 4,000 items. Compiled by two of the field's greatest living scholars, the Gneuss-Lapidge Bibliographical Handlist stands to become the most important single-volume research tool to appear in the field since Greenfield and Robinson's Bibliography of Publications on Old English Literature. Their achievement in the present book will endure for many decades and serve as a catalyst for new research across several disciplines.

Ethical Governance of Emerging Technologies Development Aug 19 2022 The more integrated technology becomes in our everyday lives and businesses, the more vital it grows that its applications are utilized in an ethical and appropriate way. Ethical Governance of Emerging Technologies Development combines multiple perspectives on ethical backgrounds, theories, and

management approaches when implementing new technologies into an environment. Understanding the ethical implications associated with utilizing new advancements in technology is useful for professionals, researchers, and graduate students interested in this growing area of research.
