Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping

gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured. An illustrated guide that covers urban hotspots such as San Francisco and LA to the natural beauty of the Yosemite National Park and the Lake Tahoe area. Camping and hiking information in Sequoia, Death Valley and the other great National Parks is included as well as the highlights of the east - Las Vegas and the Grand Canyon. Hotel and restaurant details are given to suit all budgets together with the lowdown on the coolest (or, failing that, the most interesting) clubs and bars. Comprehensive contexts sections featuring the best books and movies on California, as well as extracts from two best-selling authors are also included. Sophia Reece is a genius geneticist who's isolated the link between shifters and their animals. Unfortunately, she's also a very shy and clumsy woman. That's never more evident than when she has a not so little accident with her lion and wolf samples and ends up becoming her own guinea pig. Watch out, those needles are sharp. Damn, shit just got real. Alpha wolf Chase knows Sophia is his mate. And if she weren't so shy and always

running from him, he'd have made his move with her. He can't stop thinking about her sexy human body and how badly he wants to dip his tongue into all her curves. But when shy Sophia suddenly flashes golden eyes and smells of heat, he's not sure what's going on, but is more than ready to get her naked ASAP. Sophia isn't prepared for her first mating heat or the fact her feelings for Chase refuse to remain under wraps. When someone wants her research, she'll find out what she's really made of. Who says smart girls can't be alphas too? Things are a lot more complicated than being perfectly mated. The race is on to stop the bad guys from getting their hands on her work and staying alive. Sophia's about to learn that being in love doesn't stop someone from coming face to face with death. This non-fiction STEM and STEAM title provides emerging readers the chance to experience a range of science, technology, engineering, art, and/or math subject matter at their ability level.

When paired with its fiction-title counterpart, the reader gains two perspectives for analysis on the same topic from different sources. With its diverse landscape, mild climate, and magnificent scenery, California is truly the Golden State for outdoor enthusiasts. *Camping Northern California* will guide you to the ideal spot to pitch your tent

or park your RV while enjoying the myriad recreational opportunities the northern half of the state has to offer. Featured here are hundreds of campgrounds accessible by car and managed by public agencies--everything from primitive sites for tents and self-contained RV's to plush resorts with spas, pools tennis courts, and even golf courses. Whether you're headed for the redwood forests, the High Sierra, or the San Francisco Bay area, let this book guide you to the perfect homes away from home. The perfect charm pack project! Who can resist a perfectly coordinated and fun-filled fabric charm pack? Now make the most of your growing collection with projects designed with the charm pack lover in mind. Sew colorful and bright quilt projects, each using only one charm pack, one extra fabric, and a background fabric. All 18 projects come in two colorway options with easy to follow instructions and illustrations. Finished creations have multiple uses! Projects are perfectly sized for a baby or child, but also make for unique house decor as table toppers, wallhangings, or the perfect gift for friends and loved ones. Plus, you'll never need another excuse to keep buying those irresistibly fun charm packs! Time to clear out your charm pack stash! 18 vibrant projects that only need one charm pack each Step-by-

step instructions are beginner-friendly

Versatile quilts are great for a baby or child, but also make for fun table toppers, wallhangings, and more Suitable for children in Year 1 (age 5), *Over in the Meadow* is one of nine books from the Cambridge Reading Poetry strand. This strand offers a variety of language and illustration styles, with plenty of opportunities for speaking and listening. Children will enjoy playing with rhyming patterns and exploring language. Adapted by Kate Ruttle and Richard Brown this book contains one poem that requires children to count to six. The sunny illustrations by Rosalind Beardshaw will encourage children to count all the animals in the meadow as they read. Cambridge Reading at Key Stage 1 (Years 1 and 2) offers fiction, non-fiction, poetry and plays to introduce children to a variety of text types, authors and illustrators and provide a firm base for wider reading. This pack of 6 is for guided group reading. The rolling meadow habitat is explored in this book, which is enriched with graphic organizers, interesting text, and attention-grabbing photographs. An exciting new werewolf romance from New York Times bestselling author, Eve Langlais, author of *When an Alpha Purrs* and *Delicate Freakn' Flower*. Value Pack #5 features new video Share the Love with

backlist video 1-2-3, Count on Me. In Share the Love, Kingsley the wise lion teaches about sharing through the story of Elijah and love through the stories of David and Nebuchadnezzar. 1-2-3, Count on Me focuses on forgiveness through the story of Joseph and dependability through the story of Abraham. Nature has provided mankind with a gamut of fruits, vegetables, dairy products and other sources to maintain a healthy lifestyle. These natural sources of food are rich in vitamins, proteins, carbohydrates and other essential nutrients. Moreover, they have numerous unexplored healing powers. Through this series, we have made a sincere attempt to unfold the various benefits of these foods. You will find a cure for every big or small disease in this invaluable series, and will discover what treasure nature holds. This book is an authoritative work on the ecology of some of America's most iconic large mammals in a natural environment - and of the interplay between climate, landscape, and animals in the interior of the world's first and most famous national park. Central Yellowstone includes the range of one of the largest migratory populations of bison in North America as well as a unique elk herd that remains in the park year round. These populations live in a varied landscape with seasonal and often extreme

patterns of climate and food abundance. The reintroduction of wolves into the park a decade ago resulted in scientific and public controversy about the effect of large predators on their prey, a debate closely examined in the book. Introductory chapters describe the geography, geology and vegetation of the ecosystem. The elk and bison are then introduced and their population ecology described both pre- and post- wolf introduction, enabling valuable insights into the demographic and behavioral consequences for their ungulate prey. Subsequent chapters describe the wildlife-human interactions and show how scientific research can inform the debate and policy issues surrounding winter recreation in Yellowstone. The book closes with a discussion of how this ecological knowledge can be used to educate the public, both about Yellowstone itself and about science, ecology and the environment in general. Yellowstone National Park exemplifies some of the currently most hotly debated and high-profile ecological, wildlife management, and environmental policy issues and this book will have broad appeal not only to academic ecologists, but also to natural resource students, managers, biologists, policy makers, administrators and the general public. \*

Unrivalled descriptions of ecological

processes in a world famous ecosystem, based on information from 16 years of painstaking field work and collaborations among 66 scientists and technical experts and 15 graduate studies. \* Detailed studies of two charismatic North American herbivore species – elk and bison \* Description of the restoration of wolves into central Yellowstone and their ecological interactions with their elk and bison prey \* Illustrated with numerous evocative colour photographs and stunning maps

An exciting new animal series set in the same world as the magical Blossom Wood. Erin, Amber and Kayla are best friends who LOVE dogs. So when they discover an enchanted collar that transforms them into adorable puppies and whisks them to the beautiful Blossom Meadow, it's the best day ever! But someone is stealing all the bluebells - can the girls stop the flower thieves and save the day?

Orange Coast Magazine is the oldest continuously published lifestyle magazine in the region, bringing together Orange County's most affluent coastal communities through smart, fun, and timely editorial content, as well as compelling photographs and design. Each issue features an award-winning blend of celebrity and newsmaker profiles, service journalism, and authoritative articles on dining, fashion, home design, and travel. As

Orange County's only paid subscription lifestyle magazine with circulation figures guaranteed by the Audit Bureau of Circulation, Orange Coast is the definitive guidebook into the county's luxe lifestyle.
