The second edition of this award-winning book continues the mission of its predecessor, to provide a comprehensive compendium of research in all aspects of distance education, arguably the most significant development in education over the past quarter century. While the book deals with education that uses technology, the focus is on teaching and learning and how its management can be facilitated through technology. This volume will be of interest to anyone engaged in distance education at either the K-12 or college level. It is also appropriate for corporate and government trainers and for administrators and policy makers in all these environments. This book gives an insight into virtual as well as multimedia possibilities for professional applications, scientifically based concepts, competence development and ethical guidelines. Case studies are used to illustrate the multimedia-based, virtual implementation of systemic solution-oriented support processes. The interweaving of virtual coaching with training modules takes into account the latest trends in continuing education. For this, provider platforms and tools must meet certain requirements to ensure safety and professionalism. No-Limit hold 'em was once a game played almost exclusively in casinos. But during the last decade, the game's growth has been fueled in part by the easy availability of online playing sites where participants can play cash games and tournaments 24 hours a day, every day. In Harrington on Online Cash Games, Dan Harrington shows you the key ideas and skills that will let you master the online poker world which differs in some significant ways from the world of casino games. You'll learn how to handle different stack sizes, how to play at 6-max tables, how to deal with increased levels of aggression, and how to use the poker databases and heads-up displays that give you unprecedented information on your opponent's tendencies. Harrington lays out detailed strategies for preflop and post-flop play in both the popular micro-stakes games and the more difficult small-stakes games. If you play online poker or you're looking to get started, you'll need to read this book. Book jacket. Routledge is an imprint of Taylor & Francis, an informa company. In an age where Silicon Valley dictates what it means to innovate a painless future, knowledge and enjoyment are fertile breeding grounds of political contestation. But it's not exactly democracy. We are controlled through platforms that turn us into data for the profit of billionaires. Control has become so playful that we carry it in our pockets, as we continue to crave likes and followers. What is to be done? Should the Left continue to cling to the promise of a political Event, patiently waiting for a revolutionary rupture where new possibilities emerge? Is there a way to delineate its horizons amidst the chaos? Through a psychoanalytic interrogation of the intersections of online culture, sexuality, and politics, Bonni Rambatan and Jacob Johanssen explore such horizons at the limits of capitalism. Event Horizon examines how capitalist ideology functions in our current moment, and, more importantly, how it breaks down. With the increasing urgency of formulating a proper Leftist response to the rapidly growing violence that seriously threatens the lives of marginalised communities, this book could not be more timely. The book will focus on exploiting state of the art research in semantic web and web science. The rapidly evolving world-wide-web has led to revolutionary changes in the whole of society. The research and development of the semantic web covers a number of global standards of the web and cutting edge technologies, such as: linked data, social semantic web, semantic web search, smart data integration, semantic web mining and web scale computing. These proceedings are from the 6th Chinese Semantics Web Symposium. This title provides an analysis of the business models that are being employed because of the increased use of online auctions and exchnages for business transactions, their legal structures, and the extent to which further work is still required to fill in the legal infrastructure. FOUNDATIONS OF LEGAL RESEARCH AND WRITING, Fifth Edition is the ideal resource for paralegals. The book's up-to-the-minute coverage tackles the ever-evolving areas of computer-assisted research and Cyber law, in addition to traditional legal research, analysis, and writing. Extensive research chapters address primary and secondary sources, citing, Lexis/Nexis, the Internet, and more, while writing sections center on drafting client opinion letters, pleadings, contracts, office memos, memoranda of law, and appellate briefs. Every chapter gives you practice writing opportunities, as well as traditional and computer-assisted research assignments to help develop your skills. Detailed case excerpts, samples, tips, and discussions further support the assignments, and illustrate the many perils of inadequate research and poor legal writing. Readers everywhere agree that FOUNDATIONS OF LEGAL RESEARCH AND WRITING, Fifth Edition delivers the concepts you need for success in the most demanding law firms and legal departments today. This study of the Russian internet explores how, when, and why the internet challenges leaders in non-free states. Using an analysis of content, community, catalysts, control, and co-optation, Revolution Stalled moves beyond 'virtual' politics to show how the internet can threaten and defy information hegemony and re-shape societies. This book provides a comprehensive, authoritative, and state-of-the-art discussion of fundamental legal issues in intermediary liability online, while also describing advancement in intermediary liability theory and identifying recent policy trends. In this study Roland Fletcher argues that the built environment becomes a constraint on the long-term development of a settlement. It is costly to move settlements, or to demolish and rebuild from scratch, so the initial layout and buildings, and the forms of communication that result, may come to shackle further development and also to place constraints on social and political change. Using this theoretical framework, Dr Fletcher reviews worldwide settlement growth over the past 15,000 years, and concludes with a major discussion of the great transformations of human settlements - from mobile to sedentary, sedentary to urban, and urban to industrial. This book is an ambitious contribution to archaeological theory, and the questions it raises also have implications for the future of urban settlement. With the same design and feature sets as the market leading Precalculus, 7/e, this new addition to the Larson/Hostetler Precalculus series provides both students and instructors with sound, consistently structured explanations of the mathematical concepts. Designed for a two-term course, this text contains the features that have made Precalculus a complete solution for both students and instructors: interesting applications, cutting-edge design, and innovative technology combined with an abundance of carefully written exercises. In addition to a brief algebra review and the core precalculus topics, Precalculus with Limits covers analytic geometry in three dimensions and introduces concepts covered in calculus. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Larson's PRECALCULUS WITH LIMITS is known for delivering the same sound, consistently structured explanations and exercises of mathematical concepts as the market-leading PRECALCULUS, with a laser focus on preparing students for calculus. The human condition is affected by numerous factors in modern society. In modern times, technology is so integrated into culture that it has become necessary to perform even daily functions. Human Development and Interaction in the Age of Ubiquitous Technology is an authoritative reference source for the latest scholarly research on the widespread integration of technological innovations around the globe and examines how human-computer interaction affects various aspects of people's lives. Featuring emergent research from theoretical perspectives and case studies, this book is ideally designed for professionals, students, practitioners, and academicians. Conjoint analysis is probably the most significant development in marketing research in the past few decades. It can be described as a set of techniques ideally suited to studying customers' decision-making processes and determining tradeoffs. Though this book is oriented towards methods and applications of conjoint analysis in marketing, conjoint methods are also applicable for other business and social sciences. After an introduction to the basic ideas of conjoint analysis the book describes the steps involved in designing a ratings-based conjoint study, it covers various methods for estimating partworth functions from preference ratings data, and dedicates a chapter on methods of design and analysis of conjoint-based choice experiments, where choice is measured directly. Chapter 5 describes several methods for handling a large number of attributes. Chapters 6 through 8 discuss the use of conjoint analysis for specific applications like product and service design or product line decisions, product positioning and market segmentation decisions, and pricing decisions. Chapter 9 collates miscellaneous applications of marketing mix including marketing resource allocation or store location decisions. Finally, Chapter 10 reviews more recent developments in experimental design and data analysis and presents an assessment of future developments. This book constitutes the refereed proceedings of the Second International Conference on Digital Transformation and Global Society, DTGS 2017, held in St. Petersburg, Russia, in June 2017. The 34 revised full papers and three revised short papers presented were carefully reviewed and selected from 134 submissions. The papers are organized in topical sections on eSociety: social media analysis; eSociety: ICTs in education and science; eSociety: legal, security and usability issues; ePolity: electronic governance and electronic participation; ePolity: politics of cyberspace; eCity: urban planning and smart cities; eHealth: ICTs in public health management; eEconomy and eFinance: finance and knowledge management. A discussion of the increased accessibility to the Internet and how this has lead to a variety of resources being used for learning. Case studies and examples show the benefits of using the Internet as part of resource-based learning. Among the tests you perform on web applications, security testing is perhaps the most important, yet it's often the most neglected. The recipes in the Web Security Testing Cookbook demonstrate how developers and testers can check for the most common web security issues, while conducting unit tests, regression tests, or exploratory tests. Unlike ad hoc security assessments, these recipes are repeatable, concise, and systematic-perfect for integrating into your regular test suite. Recipes cover the basics from observing messages between clients and servers to multi-phase tests that script the login and execution of web application features. By the end of the book, you'll be able to build tests pinpointed at Ajax functions, as well as large multi-step tests for the usual suspects: cross-site scripting and injection attacks. This book helps you: Obtain, install, and configure useful-and free-security testing tools Understand how your application communicates with users, so you can better simulate attacks in your tests Choose from many different methods that simulate common attacks such as SQL injection, cross-site scripting, and manipulating hidden form fields Make your tests repeatable by using the scripts and examples in the recipes as starting points for automated tests Don't live in dread of the midnight phone call telling you that your site has been hacked. With Web Security Testing Cookbook and the free tools used in the book's examples, you can incorporate security coverage into your test suite, and sleep in peace. Shaping Education Policy is a comprehensive overview of education politics and policy during the most turbulent and rapidly changing period in American history. Respected scholars review the history of education policy to explain the political powers and processes that shape education today. Chapters cover major themes that have influenced education, including the civil rights movement, federal involvement, the accountability movement, family choice, and development of nationalization and globalization. Sponsored by the Politics of Education Association, this edited collection examines the tumultuous shifts in education policy over the last six decades and projects the likely future of public education. This book is a necessary resource for understanding the evolution, current status, and possibilities of educational policy and politics. Identifies the challenges facing parents as they raise their children in the early twenty-first century, and describes a parenting approach designed to encourage the good in kids of all ages, while steering them away from the bad. This book offers a comprehensive view of the best and the latest work in functional programming. It is the proceedings of a major international conference and contains 30 papers selected from 126 submitted. A number of themes emerge. One is a growing interest in types: powerful type systems or type checkers supporting overloading, coercion, dynamic types, and incremental inference; linear types to optimize storage, and polymorphic types to optimize semantic analysis. The hot topic of partial evaluation is well represented: techniques for higher-order binding-time analysis,

assuring termination of partial evaluation, and improving the residual programs a partial evaluator generates. The thorny problem of manipulating state in functional languages is addressed: one paper even argues that parallel programs with side-effects can be "more declarative" than purely functional ones. Theoretical work covers a new model of types based on projections, parametricity, a connection between strictness analysis and logic, and a discussion of efficient implementations of the lambda-calculus. The connection with computer architecture and a variety of other topics are also addressed. We proudly present the proceedings of 4th International Conference on Economics, Business and Economic Education Science 2021 (ICE-BEES 2021). It has focus on the innovations in economics, business, education, environment, and sustainable development. The issue of economics and sustainable development is important today. Especially in the time of Covid-19. Not only globally, but also Indonesia nationally to the local level. There are several important issues relating to this, both institutionally and the relationships between individuals and groups in supporting the agenda of sustainable development. More than 200 manuscripts were presented at this conference with 101 of them selected to be published in proceedings. We hope by this conference, discussions on the importance of sustainable development will increasingly become an important concern together. Brings better response from the government and social relations for development. Does the increasing usage of online political forums lead to a more deliberative democracy? This book presents the evolution of the public spaces in a historical perspective, by defining and operationalizing the deliberative criteria of democracy, and by measuring and evaluating the impact of virtualization of the political debates. Crowdsourcing and online collaborative translations have emerged in the last decade to the forefront of Translation Studies as one of the most dynamic and unpredictable phenomena that has attracted a growing number of researchers. The popularity of this set of varied translational processes holds the potential to reframe existing translation theories, redefine a number of tenets in the discipline, advance research in the so-called "technological turn" and impact public perceptions on translation. This book provides an interdisciplinary analysis of these phenomena from a descriptive and critical perspective, delving into industry approaches and fostering inter and intra disciplinary connections between areas in which the impact is the greatest, such as cognitive translatology, translation technologies, quality and translation evaluation, sociological approaches, text-linguistic approaches, audiovisual translation or translation pedagogy. This book is of special interest to translation researchers, translation students, industry experts or anyone with an interest on how crowdsourcing and online collaborative translations relate to past, present and future research and theorizations in Translation Studies.
