Richard Austin Freeman (11 April 1862 - 28 September 1943) was a British writer of detective stories, mostly featuring the medico-legal forensic investigator Dr. Thorndyke. He claimed to have invented the inverted detective story (a crime fiction in which the commission of the crime is described at the beginning, usually including the identity of the perpetrator, with the story

then describing the detective's attempt to solve the mystery). Freeman used some of his early experiences as a colonial surgeon in his novels. Many of the Dr. Thorndyke stories involve genuine, but often quite arcane, points of scientific knowledge, from areas such as tropical medicine, metallurgy and toxicology. This book contains: - The Case of Oscar Brodski. - A Case of Premeditation. - The Echo of a Mutiny. - The Anthropologist at Large. - The Aluminum Dagger. - By the Black Deep. - A Message From The Deep Sea. This early work by Richard Austin Freeman was originally published in 1912 and we are now republishing it with a brand new introduction. 'The Mystery of 31 New Inn' is one of Freeman's novels of crime and mystery. The first story featuring his well-known protagonist Dr. Thorndyke – a medico-legal forensic investigator –

was published in 1907, and although Freeman's early works were seen as simple homages to his contemporary, Sir Arthur Conan Doyle, he quickly developed his own style: The 'inverted detective story', in which the identity of the criminal is shown from the beginning, and the story then describes the detective's attempt to solve the mystery. When a Doctor is called to the bedside of a mysterious sick man by the name of Graves, a strange and sinister plot involving poisoning is uncovered. But who is Graves and who is the villainous Weiss into whose care he has been assigned? Doctor Thorndyke is summoned to help solve the mystery of the thirty-first new inn. The first Dr. Thorndyke mystery story. Reuben Hornby is accused of stealing diamonds from the safe of his uncle-his employer and benefactor. The sole evidence-damning evidence at that-is a paper dropped by the robber, bearing a fresh and bloody thumbprint. The thumbprint of Reuben! Richard Austin Freeman (11 April 1862 - 28 September 1943) was a British writer of detective stories, mostly featuring the medico-legal forensic investigator Dr. Thorndyke. He claimed to have invented the inverted detective story (a crime fiction in which the commission of the crime is described at the beginning, usually including the identity of the perpetrator, with the story then describing the detective's attempt to solve the mystery). Freeman used some of his early experiences as a colonial surgeon in his novels. A sworn enemy of Hawke has been shot dead and the murder weapon belongs to him. He protests his innocence and goes on the run until evidence is found to clear him. Thus, an unwilling adventure where he sets sail with a vibrant cast of men, casting off for unknown waters and strange islands. And enemies abound in the most unlikely of places. Visiting a lonely hamlet perched on a cliff above the English coast, forensic detective Dr. John Thorndyke goes for a walk on the long, deserted beach. In the sand he finds two sets of footprints, made some hours apart. They lead to a crime scene. A man has been found stabbed through the heart, his body thrown from the cliffs above. The local police are on the hunt for clues, but Thorndyke is certain the killer's identity can be determined from the footprints in the sand. With the tide coming in, he has only a few hours to catch his man. When a man is found floating beneath the skin of a green-skimmed pond one morning, Dr Thorndyke becomes embroiled in an astonishing case. This wickedly entertaining detective fiction reveals that the victim was murdered through a lethal injection and someone out there is trying to cover it up. Richard Austin Freeman (1862-1943) was a British writer of detective stories, mostly featuring the medicolegal forensic investigator Dr Thorndyke. He invented the inverted detective story and used some of his early experiences as a colonial surgeon in his novels. A large proportion of the Dr Thorndyke stories involve genuine, but often quite arcane, points of scientific knowledge, from areas such as tropical medicine, metallurgy and toxicology. His first stories were written in collaboration with Dr John James Pitcairn (1860-1936), medical officer at Holloway Prison and published under the nom de plume "Clifford Ashdown." His first Thorndyke story, The Red Thumb Mark, was published in 1907 and shortly afterwards he pioneered the inverted detective story, in which the identity of the criminal is shown from the beginning: some short stories with this feature were collected in The Singing Bone in 1912. His other works include John Thorndyke's Cases (1909), The Eye of Osiris (1911), The Vanishing Man (1911), The Mystery of 31 New Inn (1912), The Uttermost Farthing: A Savant's Vendetta (1913) and The Cat's Eye (1923). In this delightful detective story, Richard Austin Freeman should truly satisfy the inquisitive reader's mind, with incredible twists and turns and the ever-likeable Dr Thorndyke. This excellent novel presents one of the most intriguing dilemmas Freeman wrote about. The pioneering creator of the inverted detective story, R. Opening with 'The Case of the White Footprints'; revealing the secrets of 'The Blue Scarab'; and teasing all that read 'The Stolen Ingots', Freeman introduces some extraordinary detective stories to bamboozle the most able of minds. Once you pick this book up, you won't be able to put it down. "Freeman should not be overlooked. After all, his Dr. John Thorndyke is the forerunner of all those CSI and forensic investigators that we read about today in mystery novels and binge watch on TV. A quick, witty read -- with new illustrations." - Hollis George, editor and bibliophile This is the second Dr. Thorndyke novel, published in England as The Eye of Osiris in England. The titular "vanishing man" is wealthy old John Bellingham, a collector of Egyptian antiquities, who has disappeared without a trace. Thorndyke gets involved to protect a friend from being wrongly charged with murder. When Andrew Drayton, a collector of jewelry, is found stabbed to death and the young woman who tried to stop the murderer is wounded, Dr Thorndyke is called in to investigate. But although the scene of the crime seems awash with the fingerprints of the attacker, there may be good reason why the police can't trace the killer. But not only are the facts of the case proving to be vexing but the discovery of a secret chamber and its sinister contents help to reveal that this is no ordinary murder and no

ordinary murderer is behind it. One November day in 1902, John Bellingham disappears from the study of a friend's house where he had been waiting for his friend to return home. Two years later, there has still been no sign of him and his potential heirs are left in limbo, unable to execute his rather strange will. And then pieces of a dismembered skeleton begin to show up in odd places. Meantime, young Dr Paul Berkeley, our narrator, has fallen in love with Ruth Bellingham, the missing man's niece, whose father is one of the potential heirs. He persuades Ruth's father, Godfrey Bellingham, to allow Dr John Thorndyke, an expert in medical jurisprudence, to look into the case. It's up to Thorndyke to find a way to identify the remains and to find out what was behind Bellingham's disappearance. "The First R.
