This course provides a non-technical overview of the phases, operations and terminology used on offshore drilling platforms. It is intended also for non-drilling personnel who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of drilling operations, with a particular focus on the unique aspects of offshore operations. What is the effect of revolutions on legal systems? What role do constitutions play in legitimating regimes? How do constitutions and revolutions converge or clash? Taking the Arab Spring as its case study, this book explores the role of law and constitutions during societal upheavals, and critically evaluates the different trajectories they could follow in a revolutionary setting. The book urges a rethinking of major categories in political, legal, and constitutional theory in light of the Arab Spring. The book is a novel and comprehensive examination of the constitutional order that preceded and followed the Arab Spring in Egypt, Tunisia, Libya, Morocco, Jordan, Algeria, Oman, and Bahrain. It also provides the first thorough discussion of the trials of former regime officials in Egypt and Tunisia. Drawing on a wide range of primary sources, including an in-depth analysis of recent court rulings in several Arab

countries, the book illustrates the contradictory roles of law and constitutions. The book also contrasts the Arab Spring with other revolutionary situations and demonstrates how the Arab Spring provides a laboratory for examining scholarly ideas about revolutions, legitimacy, legality, continuity, popular sovereignty, and constituent power. This wide-ranging investigation probes traditional associations between the 'happy ending' and homogeneity, closure, 'unrealism', and ideological conservatism, testing widespread assumptions against the evidence offered by a range of classical and contemp Since the late 1960s, the novels of Sjowall and Wahloo's Martin Beck detective series, along with the works of Henning Mankell, Hakan Nesser and Stieg Larsson, have sparked an explosion of Nordic crime fiction--grim police procedurals treating urgent sociopolitical issues affecting the contemporary world. Steeped in noir techniques and viewpoints, many of these novels are reaching international audiences through film and television adaptations. This reference guide introduces the world of Nordic crime fiction to English-speaking readers. Caught between the demands of conscience and societal strictures, the detectives in these stories--like the heroes of Norse mythology--know that they and their world must perish, but fight on regardless of cost. At a time of bleak eventualities, Nordic crime fiction interprets the bitter end as a celebration of the indomitable human spirit. The job interview is

probably the most important step you will take in your job search journey. Because it's always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry. Since these questions are so common, hiring managers will expect you to be able to answer them smoothly and without hesitation. This eBook contains 289 questions and answers for job interview and as a BONUS web addresses to 289 video movies for a better understanding of the technological process. Through engagement with human behaviour from the level of the private individual to the international community, in *Amnesty and Revolution: An Amateur's View of Life As It Stands* a holistic type of reform is advocated; solutions to scarcity and inequity are formulated with due regard to the cost of revoking commitments already in motion. The author's rationale is to provide a counterbalance wherever excess or paucity is perceived, and by applying a moderate degree of erudition and scientific understanding to the exercise of drawing inferences and forging creative associations, the book's themes are addressed intellectually and intuitively. In *Amnesty and Revolution* the author specifically addresses domestic economic and social policy,

social work, mental health, health problems associated with modern technology, renewable and non-renewable energy, environmental policy, globalisation, international conflicts and internal security. The author consistently targets systems rather than specific actors, in order to appease those who despite their culpability possess skills and experience which may be useful in effecting peaceable reform. In several places within the text there are extensive descriptions which serve as expedient points of access to the text's central arguments. Since these descriptions serve as introductions to topics which are related to academic specialisms, although hitherto they may not have been recognised as such, this book would be of great value to academics. Indeed, industrial specialisation and the manner in which this can prevent the context of a specialism being understood by its practitioners is a theme which is explored within the text. While some explanations would be understood more easily with foreknowledge of certain scientific principles, the central arguments of the text are accessible without scientific explanations needing to be fully understood. Accordingly the book is suitable for a general audience, and especially anyone with an interest in progressive politics, addressing as it does a range of contentious issues. This collection brings together the research of an eclectic mix of leading names in home-based education studies worldwide. It uses home education to explore contemporary education

outside of school and place it into a global, political and critical context, and will be essential reading for home educators, academics and policymakers alike. The renowned Internet commentator and author of *How to Fix the Future* "expos[es] the greed, egotism and narcissism that fuels the tech world" (Chicago Tribune). The digital revolution has contributed to the world in many positive ways, but we are less aware of the Internet's deeply negative effects. *The Internet Is Not the Answer*, by longtime Internet skeptic Andrew Keen, offers a comprehensive look at what the Internet is doing to our lives. The book traces the technological and economic history of the Internet, from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative, informed by the work of other writers, reporters, and academics, as well as his own research and interviews, Keen shows us the tech world, warts and all. Startling and important, *The Internet Is Not the Answer* is a big-picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant, unforeseen aftershocks. "Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture, he is its conscience, and must be heard." —Po Bronson,

Reckoning with colonial legacies in Western museum collections What are the possibilities and limits of engaging with colonialism in ethnological museums? This book addresses this question from within the Africa department of the Ethnological Museum in Berlin. It captures the Museum at a moment of substantial transformation, as it prepared the move of its exhibition to the Humboldt Forum, a newly built and contested cultural centre on Berlin's Museum Island. The book discusses almost a decade of debate in which German colonialism was negotiated, and further recognised, through conflicts over colonial museum collections. Based on two years of ethnographic fieldwork examining the Museum's various work practices, this book

highlights the Museum's embeddedness in colonial logics and shows how these unfold in the Museum's everyday activity. It addresses the diverse areas of expertise in the Ethnological Museum – the preservation, storage, curation, and research of collections – and also draws on archival research and oral history interviews with current and former employees. Working through Colonial Collections unravels the ongoing and laborious processes of reckoning with colonialism in the Ethnological Museum's present – processes from which other ethnological museums, as well as Western museums more generally, can learn. It is not hyperbole to suggest that the foundations of post-cold war security in Europe have been badly damaged by the conflict in Ukraine since 2014. Russia's annexation of Crimea and intervention in eastern Ukraine appear to have created a 'simmering' conflict, which may take years to resolve and have profound consequences for the European security environment. This volume explores the various political, economic and social aspects of these profound changes and their wider significance for Europe, bringing together contributions by scholars from across the continent and in various disciplinary fields to offer an authoritative, in-depth examination of the complex causes of the Ukraine crisis and the consequences for Ukrainian statehood, Ukraine's relations with Russia, Russia's own domestic governance and Russia's relations with Europe. "Conscientious and compassionate use of our money in a world where people spend \$310 million on costumes for their pets and \$5 billion on entertaining ringtones for their phones is not an easy task. The temptation to spend now and think later (or never!) is ever-present, but with good intentions and prayerful hearts, we can slow down and reflect on what we earn, how we spend it, who is affected by it, and who we can share it with." —from the introduction Every Christian knows that we are called to love God with all our heart, mind, soul, and strength. But what about our wallet? We are asked to open it every Sunday when the offering basket comes by and are told that giving is a way of being a "good steward," but what about spending money at a restaurant or grocery store? Best-selling author Mike Slaughter offers a comprehensive look at how Christians use their money in *The Christian Wallet*. Slaughter explores today's culture of consumerism and the impact of what we buy, asking difficult questions about morality and money while acknowledging that there are no easy answers.

Throughout the book, profiles of real people inspire thoughtful reflection about the true value of money and the rewards of conscious spending. Questions for individual or group study are also included with each chapter. The Christian Wallet helps Christians grapple with important questions about using money: how we spend, how we live, how we save, how we give, and what it all means. Currently the borders that delineate both physical and ideological spaces are constantly shifting within and around Europe. Given this, in 2014 the Graduate Centre for Europe (GCfE) decided to dedicate their annual conference to the theme of travel and tourism in Europe. This collection consists of the papers accepted for presentation as part of the 8th annual conference of the GCfE. The yearly colloquium provides an opportunity for postgraduates across a variety of academic backgrounds to en ... Before the turn of the century, few states used immigration detention. Today, nearly every state around the world has adopted immigration detention policy in some form. States practice detention as a means to address both the accelerating numbers of people crossing their borders, and the populations residing in their states without authorisation. This edited volume examines the contemporary diffusion of immigration detention policy throughout the world and the impact of this expansion on the prospects of protection for people seeking asylum. It includes contributions by immigration detention experts

working in Australasia, the Americas, Europe, Africa and the Middle East. It is the first to set out a systematic comparison of immigration detention policy across these regions and to examine how immigration detention has become a ubiquitous part of border and immigration control strategies globally. In so doing, the volume presents a global perspective on the diversity of immigration detention policies and practices, how these circumstances developed, and the human impact of states exchanging individuals' rights to liberty for the collective assurance of border and immigration control. This text will be of key interest to scholars, students and practitioners of immigration, migration, public administration, comparative policy studies, comparative politics and international political economy. The Wrong Story lays bare the flaws in the way large media organizations present the Palestine-Israel issue. It points out major fallacies in the fundamental conceptions that underpin their coverage, namely that Palestinians and Israelis are both victims to comparable extents and are equally responsible for the failure to find a solution; that the problem is “extremists,” often religiously-motivated ones, who need to be sidelined in favour of “moderates”; and that Israel’s uses of force are typically justifiable acts of self-defense. Weaving together the existing literature with new insights, Shupak offers an up-to-date and tightly focused guide that exposes the distorted way these issues are presented and why each is misguided. The crime of homicide has long animated academic debate, community concern and political attention. The discussion has often centered on the perceived (in)adequacy of legal responses to homicide, questions of culpability, and divergent representations of victims and offenders. Within this, notions of gender, responsibility and justice are pivotal. This edited collection builds on existing scholarship by examining these concerns not only in the context of the ‘private’ world of domestic murder but also in the more ‘public’ world of the state, the corporation, war, and genocide. In so doing this book draws from key frameworks of criminological thought, legal analysis and empirical evidence to critically examine the relationship between homicide, gender and responsibility. Bringing together leading international criminology and legal scholars, this collection provides a unique contribution to the academic and policy engagement with what is, more often than not, an ordinary and mundane crime. Analysing the crime in a variety of different social contexts alongside an in-depth and critical analysis of the interconnections between the ordinary act of lethal violence, gender and notions of responsibility, this book will be of interest to students, scholars and policymakers working in criminology and socio-legal studies. Teaching

physical education is a challenging but rewarding occupation. Finding a way into the profession can be a daunting task while regular changes in government policy can make it hard to stay up to date. This engaging new book explains the process of becoming and being a teacher of secondary school physical education, from the various routes of entry into the profession, to the realities of being a qualified PE teacher, to the ways in which experienced teachers can become teacher educators and nurture the next generation. It combines rich personal accounts of teaching in, and being taught, physical education, with practical advice for trainees, newly qualified teachers and established professionals, with an emphasis throughout on the importance of critical self-reflection. The book begins by exploring the nature and purpose of physical education and examining the historical development of initial teacher training. It examines recent changes in training, policy and curriculum, and offers an overview of the various ways of becoming a PE teacher, including the Post Graduate Certificate in Education (PGCE) and school and employment based routes. The book offers advice on what to expect at interview, meeting the standards for qualifying to teach, and on how to survive the difficult first year as a newly-qualified teacher. It also outlines the challenges and rewards of being a qualified teacher, mentor or curriculum leader, as well as a teacher educator within higher education. Concise, helpful, and filled with sensible

insights based on real experiences of teaching physical education, *Becoming a Physical Education Teacher* is an essential read for anybody considering entering the profession, or for students, trainees, newly qualified or experienced teachers wanting to understand better the process of becoming, and being, a successful PE teacher. UGC NET library Science unit 10 book with 400 question answer (theory+mcq) as per updated syllabus What would you do if a category five monster cyclone was headed your way? Drive as far as you could, as quickly as you could in the opposite direction? What if there were no cars? What if there were no roads? What if you were on a tiny island? What if there was nowhere to run to? How would you feel, knowing that when it was over it could be weeks before anyone came to help? Thousands of people live with this possibility every day, and their resilience and coping skills are incredible. However, climate change threatens to make these events worse, and all the while the sea levels are rising, and these islands are sinking. Bringing together the perspectives of the people on small, remote islands in the South Pacific, the aid organisations who help after a disaster, and the governments, this book investigates how we should respond. These are the stories of people for whom climate change is not a theoretical future, but a daily reality. 4th Refuting the Myth of Evolutionism and Exposing the Folly of Clergy Letters The Darwinian theory of evolution begins with facts (science of

microevolution) and ends with fiction (myths of macroevolution). The myths are part of our experience, no transitional organisms in the living world, and part of our discoveries, no transitional fossils in such deposits at the Burgess Shale and Chengjiang sites, where various kinds of organisms appear together in large collection. In his fourth book, *Refuting the Myth of Evolutionism and Exposing the Folly of Clergy Letters*, author, Michael Ebifegha, stresses that real science is timeless and based on events that are directly or indirectly observable, testable, and repeatable. Challenging evolutionists and their clerical allies who are banning the teaching of creationism in public schools, Ebifegha insists that evolutionism is also outside sciences purview and, therefore, should be banned as well. He reprimands clerics for capitalizing on human knowledge but failing to recognize the validity of Gods personal claim in speech before an audience and in print on stone tablets for having created the world. These interventions, he asserts, fulfill the worlds standard legal requirement for inventors. Ebifegha argues that the inconsistency of imposing evolutionism as scientific truth on the public and banning creationism violates (1) the academic rights of accomplished scientists who disagree with evolutionism on scientific grounds; (2) the US Supreme Courts 1992 declaration, At the heart of liberty is the right to define ones own concept of existence, of meaning, of the universe, and of the mystery of human life; and

(3) Gods historical claim to ownership of the universe. Instead of separation of church and state, Ebifegha recommends separation of worldviews and state. If it's essential to project management... it's in here! The first edition of The Project Management Answer Book addressed all the key principles of project management that every project manager needs

to know. With a new chapter on scrum agile, updates throughout, and many new PMP® test tips, this new edition builds on that solid foundation. The structure of this update maps closely to the PMBOK® Guide, Fifth Edition, and is designed to assist anyone studying for the PMP® and other certification exams. Helpful sections cover: • Networking and social media tips for PMs, including the best professional organizations, virtual groups, and podcast resources • The formulas PMs need to know, plus a template to help certification candidates prepare and self-test for their exams • Quick study sheet for the processes covered on the PMP® exam • Key changes in PMBOK® Guide, Fifth Edition, for readers familiar with earlier versions who want “the skinny” on the new version. PMs at every level will find real gold in the information nuggets provided in this new edition. Those new to project management will find the comprehensive coverage and the depth of the answers especially valuable, and will like the easy-to-read style and Q&A format. For experienced managers looking for new tools and skills to help them pass their PMP® or other certification exams, this is a must-have resource. Until Every Animal is Free is an insightful, candid work heralding the Animal Liberation Movement as the next logical step on the path of social justice, dispelling many of the myths that keep us from getting there. In it, Saryta Rodriguez challenges the Myth of Human Supremacy, and explores some of the ideological pillars behind the belief that

humans are superior to all other animals. This book also discusses animal liberation theory, as well as (primarily twenty-first century) efforts to put animal liberation on the public agenda. This is the Committee's first major inquiry on prisons planning and policies in this Parliament, and it has provided an opportunity to consider the impact of the Government's programme of reforms and efficiency savings across the prison estate. These policies have been implemented alongside the creation of working prisons and resettlement prisons, designed to improve the effectiveness of the prison estate in increasing employability and reducing re-offending, as well as the tightening of operational policies on earned privileges and

temporary release in order to improve their public credibility. They have also come at a time when the total prison population has returned to very high levels. The Committee expresses concern that despite the Government's efforts to supply sufficient prison places to meet demand, the proportion of prisons that are overcrowded is growing, and the proportion of prisoners held in crowded conditions remains at almost a quarter, with consequent effects on the ability to maintain constructive regimes. The Committee welcomes the reduction which has taken place in the cost of a prison place, although the Committee notes that it remains high, and is unlikely to fall significantly while the pressures on estate capacity remain at current levels Visual Question Answering (VQA) usually combines visual inputs like image and video with a natural language question concerning the input and generates a natural language answer as the output. This is by nature a multi-disciplinary research problem, involving computer vision (CV), natural language processing (NLP), knowledge representation and reasoning (KR), etc. Further, VQA is an ambitious undertaking, as it must overcome the challenges of general image understanding and the question-answering task, as well as the difficulties entailed by using large-scale databases with mixed-quality inputs. However, with the advent of deep learning (DL) and driven by the existence of advanced techniques in both CV and NLP and the availability of relevant large-

scale datasets, we have recently seen enormous strides in VQA, with more systems and promising results emerging. This book provides a comprehensive overview of VQA, covering fundamental theories, models, datasets, and promising future directions. Given its scope, it can be used as a textbook on computer vision and natural language processing, especially for researchers and students in the area of visual question answering. It also highlights the key models used in VQA. Experience 100 key dates that shaped Sunderland's history, highlighted its people's genius (or silliness) and embraced the unexpected. Featuring an amazing mix of social, criminal and sporting events, this book reveals a past that will fascinate, delight and even shock both residents and visitors of the city. This book examines the crisis in Ukraine, tracing its development and analysing the factors which lie behind it. It discusses above all how the two sides have engaged in political posturing, accusations, escalating sanctions and further escalating threats, arguing that the ease with which both sides have reverted to a Cold War mentality demonstrates that the Cold War belief systems never really disappeared, and that the hopes raised in the aftermath of the collapse of the Soviet Union for a new era in East-West relations were misplaced. The book pays special attention to the often ignored origins of the crisis within Ukraine itself, and the permanent damage caused by the fact that Ukrainians are killing Ukrainians in the eastern parts of the country. It also assesses why Cold

War belief systems have re-emerged so easily, and concludes by considering the likely long-term ramifications of the crisis, arguing that the deep-rooted lack of trust makes the possibility of compromise even harder than in the original Cold War.
