With photos, experiments, and more, this "appealing and highly informative" science book from the beloved TV host is "a winner" (School Library Journal). Science educator, TV host, and New York Times–bestselling author Bill Nye is on a mission to help young people understand and appreciate the science that makes our world work. Featuring a range of subjects—physics, chemistry, geology, biology, astronomy, global warming, and more—this profusely illustrated book covers the basic principles of each science, key discoveries, recent revolutionary advances, and the problems that science still needs to solve for our Earth. Nye and coauthor Gregory Mone present the most difficult theories and facts in an easy-to-comprehend, humorous way. They interviewed numerous specialists from around the world, in each of the fields discussed, whose insights are included throughout. Also included are experiments kids can do themselves to bring science to life! "Wordplay and wry wit put extra fun into a trove of fundamental knowledge." —Kirkus Reviews (starred

review) Includes photographs, illustrations, diagrams, glossary, bibliography, and index "Evolution is one of the most powerful and important ideas ever developed in the history of science. Every question it raises leads to new answers, new discoveries, and new smarter questions. The science of evolution is as expansive as nature itself. It is also the most meaningful creation story that humans have ever found."—Bill Nye Sparked by a controversial debate in February 2014, Bill Nye has set off on an energetic campaign to spread awareness of evolution and the powerful way it shapes our lives. In *Undeniable: Evolution and the Science of Creation*, he explains why race does not really exist; evaluates the true promise and peril of genetically modified food; reveals how new species are born, in a dog kennel and in a London subway; takes a stroll through 4.5 billion years of time; and explores the new search for alien life, including aliens right here on Earth. With infectious enthusiasm, Bill Nye shows that evolution is much more than a rebuttal to creationism; it is an essential way to understand how nature works—and to change the world. It might also help you get a date on a Saturday night. *Media Dictatorship: How Schools and Educators Can Defend Freedom of Speech* examines how the increasing power of the media is dangerous to democracy and modern civilization. Educators and administrators have a responsibility to develop a generation of students who value freedom of speech and can defend and sustain both democracy and civilization. New York Times bestselling authors Bill Nye the Science Guy and Gregory Mone take middle-grade readers on a scientific adventure in the launch of an exciting new chapter book series, *Jack and the Geniuses*. The perfect combination to engage and entertain readers, the series features real-world science along with action and a mystery that will leave kids guessing until the end, making these books ideal for STEM education. In the series opener, *Jack and the Geniuses: At The Bottom of The World*, readers meet Jack and his foster siblings, Ava and Matt, who are orphans. But they're not your typical kind of orphans—they're geniuses. Well, Ava and Matt are, which sometimes makes life difficult for twelve-year-old Jack. Ava speaks multiple languages and builds robots for fun, and Matt is into astronomy and a whiz at math. As for Jack, it's hard to stand out when he's surrounded by geniuses all the time. When the kids try to spy on Dr. Hank Witherspoon, one of the world's leading scientists, they end up working for him in his

incredible laboratory. Soon, Hank and the kids travel to Antarctica for a prestigious science competition, but they find that all is not as it seems: A fellow scientist has gone missing, and so has any trace of her research. Could someone be trying to use her findings to win the contest? It's up to Jack, Ava, and Matt to find the missing scientist and discover who's behind it all—before it's too late. Integrating real science facts with humor and suspense, and featuring an ensemble cast of loveable boy and girl characters, this uniquely engaging series is an irresistible chemical reaction for middle-grade readers. With easy-to-read language presented in a fun, motivating, and accessible way, this series opener is a great book for both inquisitive kids and reluctant readers. The book also includes information about the science discussed and used to solve the mystery, as well as a cool science project about density that kids can do at home or in the classroom. Bill Nye's brand new talk show series for Netflix, "Bill Nye Saves the World" is set to launch in Spring 2017. Although Bill Nye (1850-1896) was America's best known humorist in the late 1880's and early 1890's, his work is little known today--his books long out of print and his columns yellowing in newspaper files. Now T. A. Larson, a dyed-in-the-wool Nye fan for more than thirty years, has assembled the best of Bill Nye's work, most of it dating from the seven Wyoming years when Nye made his name. The selections are chosen from Laramie, Cheyenne, and Denver newspapers and from six books published in the 1890's. The resulting collection is both good fun and a valuable picture of a lively period. Bill Nye on the Cow Industry. A New Biography of Galileo. Methuselah. Notes on Some Spring Styles. Hunting an Ichthyosaurus. True Merit Rewarded. Bill Nye condoles with Cleveland. No Doubt as to His Condition. Cyclones. The Earth. Francisco Pizarro's Career. Bill Nye. Bill Nye "Incubates." Bill Nye on Tobacco.—A Discourager of Cannibalism. Bill Nye's Arctic- le. Bill Nye's Answers to Correspondents. Bill Nye Preparing A Political Speech in Advance for a Time of Need. Bill Nye on Railroads. Bill Nye's Letter. Bill Nye Favored a Higher Fine. How Bill Nye Failed to Make the Amende Honorable—a Pathetic Incident. Seeing a Saw Mill. Declined with Thanks. In the New York Times bestseller *Everything All at Once*, Bill Nye shows you how thinking like a nerd is the key to changing yourself and the world around you. Everyone has an inner nerd just waiting to be awakened by the right passion. In *Everything All at Once*, Bill Nye will help you find yours. With his call to arms, he wants you to examine every detail of the most difficult problems that look unsolvable—that is, until you find the solution. Bill shows you how to develop critical thinking skills and create change, using his “everything all at once” approach that leaves no stone unturned. Whether addressing climate change, the future of our society as a whole, or personal success, or stripping away the mystery of fire walking, there are certain strategies that get results: looking at the world with relentless curiosity, being driven by a desire for a better future, and being willing to take the actions needed to make change happen. He shares how he came to create this approach—starting with his Boy Scout training (it turns out that a practical understanding of science and engineering is immensely helpful in a capsizing canoe) and moving through the lessons he learned as a full-time engineer at Boeing, a stand-up comedian, CEO of The Planetary Society, and, of course, as Bill Nye The Science Guy. This is the story of how Bill Nye became Bill Nye and how he became a champion of change and an advocate of science. It’s how he became The Science Guy. Bill teaches us that we have the power to make real change. Join him in... dare we say it... changing the world. New York Times bestselling authors Bill Nye the Science Guy and Gregory Mone take middle-grade readers on a scientific adventure in Book 2 of the exciting new *Jack and the Geniuses* series. The series combines real-world science along with a mysterious adventure that will leave kids guessing until the end, making the books ideal for STEM education. In the second installment, *In the Deep Blue Sea*, Jack, his genius siblings Ava and Matt, and inventor Dr. Hank Witherspoon travel to the Hawaiian island home of Ashley Hawking, a technology billionaire. Hawking and engineer Rosa Morris have built a revolutionary electricity plant that harvests energy from the deep ocean, but someone has been sabotaging the project. In their search for the culprit, Jack and crew navigate an unusual world of characters and suspects, including Hawking and her obnoxiously intelligent son, Steven; a family of surfers who accuse the billionaire of trespassing on sacred land; an ex-Navy SEAL with a fondness for cat photos; and

a cigar-chomping man who calls himself the Air-Conditioning King of Hawaii. Readers will learn about the mysteries of the deep ocean, the scientific process, and the potential of green energy as Jack and his brilliant siblings use all their brainpower to survive. Integrating real science facts with humor and suspense and featuring a multiethnic cast of boy and girl characters, this engaging series is an irresistible combination for middle-grade readers. With easy-to-read language presented in a fun and accessible way, these books are great for both inquisitive kids and reluctant readers. In the Deep Blue Sea: Jack and the Geniuses Book 2 includes information about the science discussed and used to solve the mystery, as well as a cool project that kids can do at home or in the classroom. Bill Nye's brand-new talk show series for Netflix, Bill Nye Saves the World, premieres on April 21, 2017. In this revelatory book, Callum Roberts uses his lifetime's experience working with the oceans to show why they are the most mysterious places on earth, their depths still largely unexplored. In The Ocean of Life we get a panoramic tour beneath the seas- Why do currents circulate the way do? Where exactly do they go? How has the chemistry of the oceans changed? How polluted are we making them? Above all, Roberts reveals the richness of life in the deep, and how it has altered over the centuries. The oceans are now under unprecedented threat. Not only does Roberts show how we are fishing our oceans to extinction, crucially, he explains how this directly affects our lives on land. Ninety-five percent of habitable space on earth lies in the oceans, and marine plants produce half the world's oxygen; the oceans themselves absorb vast quantities of carbon dioxide. The life they support is now in the balance. Callum Roberts shows how we can arrest and reverse the damage we are doing, and Ocean of Lifewill galvanise debate worldwide on the future of our planet. Tantalisingly, it is within our grasp to restore the life of the oceans. There is still time. "The world is ending because of climate change!" Every day we are bombarded with apocalyptic warnings telling us that if we do not change our ways and dismantle our economies, we will destroy the planet. But what if it is all a cynical hoax perpetrated by power-hungry activists and politicians for their own purposes? In this book, James Wright asks that question, joining a multitude of skeptics who challenge the increasingly hysterical claims of "climate fanatics" and the science that supposedly underpins them. With Millions watching this live

debate on February 4, 2014, "Bill Nye, the Science Guy" squared off with Answers in Genesis founder and president Ken Ham. This event echoed the worldviews at work in our lives today and put two of the most unique and recognizable advocates of their positions on the same stage to face not only each other, but the many who watched. More answers, more perspectives, more truth to answer the world's most critical question: How did we and all we know come to be here, at this place and this time in the history of the universe? The Journal of Biblical and Theological Studies (JBTS) is an academic journal focused on the fields of Bible and Theology from an inter-denominational point of view. The journal is comprised of an editorial board of scholars that represent several academic institutions throughout the world. JBTS is concerned with presenting high-level original scholarship in an approachable way. Academic journals are often written by scholars for other scholars. They are technical in nature, assuming a robust knowledge of the field. There are fewer journals that seek to introduce biblical and theological scholarship that is also accessible to students. JBTS seeks to provide high-level scholarship and research to both scholars and students, which results in original scholarship that is readable and accessible. As an inter-denominational journal JBTS is broadly evangelical. We accept contributions in all theological disciplines from any evangelical perspective. In particular, we encourage articles and book reviews within the fields of Old Testament, New Testament, Biblical Theology, Church History, Systematic Theology, Practical Theology, Philosophical Theology, Philosophy, and Ethics. Although many individuals identify as atheists, little is understood about the belief system beyond the simple lack of a belief in a higher power. Hannah K. Scheidt's Practicing Atheism: Culture, Media, and Ritual in the Contemporary Atheist Network unpacks the cultural products, both corporate-driven and grassroots, that carry messages about atheism to examine the complicated relationship between

organized atheism and religion. Famed inventor Henry "Hank" Witherspoon has gone missing, and it's up to Jack and his brilliant siblings, Ava and Matt, to find him. At Hank's ransacked lab, the siblings discover clues to the project he's been working on—a new way to generate and store electricity, inspired by the electric eels of the Amazon. The kids travel deep into the Amazon jungle, following a series of clues Hank has left. Relying on genius, cunning, and new technology, the kids overcome strange creatures, a raging river, and some very clever foes to find their friend and protect his big idea. Like volumes one and two, *Lost in the Jungle* features a glossary of terms and an experiment kids can do at home or at school.

Science for English Language Learners brings you the best practices from different but complementary fields of science education and English language teaching, integrating the two. The book is designed so you can easily dip in and out of the topics you want. It's organized into four sections.

The Answer Book: A Devotional for Busy Families recognizes that today's families keep hectic schedules, often leaving mere scraps of time for asking and answering spiritual questions. Nancy Ruth brings years of experience in children's ministry and a master's degree in theology to bear in crafting a seven-week set of daily devotions that offers families assistance in exploring how to live as Christians. Adults, who sometimes find children challenging them with hard questions about the Christian life, will find *The Answer Book* enables them to ask those questions as a family, to listen to God's Word, and to discover its answers. Each weekly section addresses a major topic, including truth, the reasons for spending time with God, the identity of Jesus, and family discipleship. Each daily devotion shares a brief reflection, suggests a Bible reading, presents an "On the Road" challenge to the family, and calls for a "Weapon Check," in which one memorizes key scriptural passages. As you spend time around your children, you may wonder what drives them to ask endlessly, "Why?" *The Answer Book: A Devotional for Busy Families* gives you a structured—yet flexible—way to turn small blocks of time into moments for taking seriously their deep and heartfelt questions. By spending some time together as a family with these questions and with the message God reveals in the Scriptures, you will grow together to trust God more fully, to build your lives on a strong foundation, and to be prepared for life's coming challenges. In the *New York Times* bestseller

Troops had no blankets, and straw was not to be had. It was extremely sad; but there was no wavering. Officers were approached by the enemy with from one hundred to one thousand pounds if they would accept and use their influence to effect a reconciliation; but, with blazing eye and unfaltering attitude, each stated that he was not for sale, and returned to his frozen mud-hole to rest and dream of food and freedom. Those were the untitled nobility from whom we sprung. Let us look over our personal record and see if we are living lives that are worthy of such heroic sires. Five minutes will now be given the reader to make a careful examination of his personal record. In the spring the joyful news came across

the sea that, through the efforts of Benjamin Franklin, France had acknowledged the independence of the United States, and a fleet was on the way to assist the struggling troops. The battle of Monmouth occurred June 28. Clinton succeeded Howe, and, alarmed by the news of the French fleet, the government ordered Clinton to concentrate his troops near New York, where there were better facilities for getting home. Washington followed the enemy across New Jersey, overtaking them at Monmouth. Lee was in command, and got his men tangled in a swamp where the mosquitoes were quite plenty, and, losing courage, ordered a retreat. Washington arrived at that moment, and bitterly upbraided Lee. He used the Flanders method of upbraiding, it is said, and Lee could not stand it. He started towards the enemy in preference to being there with Washington, who was still rebuking him. The fight was renewed, and all day long they fought. When night came, Clinton took his troops with him and went away where they could be by themse... Reproduction of the original: Comic History of the United States by Bill Nye This book deals with professional creationist and anti-creationist organizations in America, and describes how the "conflict between science and religion" is the result of the interaction between these two groups. It retraces their history from the 1960s onwards, and identifies crucial turning points that led to new forms of creationism and anti-creationism. It explains their strategies, labels and arguments as effects of this history and structure. Taking a field theoretical approach, the book avoids problems of prior creationism research, making it possible to identify the mechanisms through which creationism generates new strategies, arguments, and media output. The field model is used as an interpretive tool to make sense of some of the most important creationist and anti-creationist publications and media statements. In those days agriculture, trade, and manufacturing were diversions during the summer months; but the regular business of life was warfare with the Danes, Scots, and Welsh. These foes of England could live easily for years on oatmeal, sour milk, and cod's heads, while the fighting clothes of a whole regiment would have been a scant wardrobe for the Greek Slave, and after two centuries of almost uninterrupted carnage their war debt was only a trifle over eight dollars.-from "The Troublous Middle Ages" One of the most beloved humorists of the late 19th century, Bill Nye was forced, by his untimely death, to leave unfinished his twisted history of

England. But though he was able to tweak the Brits only through the era of King Henry VIII, this 1896 book is nevertheless a classic of historical satire, one that will delight fans of such works as *1066 and All That*. Profusely illustrated by the witty cartoons of W. M. Goodes and A. M. Richards, Nye's cheeky humor as he rampages through the storied past of the Sceptred Isle is as clever as it is wily, demonstrating a shrewd understanding of human nature as the driving force of history.

American writer EDGAR WILSON "BILL" NYE (1850-1896) also wrote *Bill Nye's History of the United States*, *Bill Nye and Boomerang*, and *Forty Liars and Other Lies*. Just as World War II called an earlier generation to greatness, so the climate crisis is calling today's rising youth to action: to create a better future. In *UNSTOPPABLE*, Bill Nye crystallizes and expands the message for which he is best known and beloved. That message is that with a combination of optimism and scientific curiosity, all obstacles become opportunities, and the possibilities of our world become limitless. With a scientist's thirst for knowledge and an engineer's vision of what can be, Bill Nye sees today's environmental issues not as insurmountable, depressing problems but as chances for our society to rise to the challenge and create a cleaner, healthier, smarter world. We need not accept that transportation consumes half our energy, and that two-thirds of the energy you put into your car is immediately thrown away out the tailpipe. We need not accept that dangerous emissions are the price we must pay for a vibrant economy and a comfortable life. Above all, we need not accept that we will leave our children a planet that is dirty, overheated, and depleted of resources. As Bill shares his vision, he debunks some of the most persistent myths and misunderstandings about global warming. When you are done reading, you'll be enlightened and empowered. Chances are, you'll be smiling, too, ready to join Bill and change the world. In *Unstoppable: Harnessing Science to Change the World*, the New York Times bestselling author of *Undeniable: Evolution and the Science of Creation* and former host of "Bill Nye the Science Guy" issues a new challenge to today's generation: to make a cleaner, more efficient, and happier world. Praise for *UNDENIABLE*: "With his charming, breezy, narrative style, Bill empowers the reader to see the natural world as it is, not as some would wish it to be. He does it right. And, as I expected, he does it best." -Neil deGrasse Tyson, Ph.D, host of *COSMOS* "Bill Nye, 'the Science Guy,' has

become a veritable cultural icon....[T]he title of his new book on evolution...[is] 'Undeniable,' because, yes, there are many Americans who still deny what Darwin and other scientists long ago proved." -Frank Bruni, The New York Times "With a jaunty bow tie and boyish enthusiasm, Bill Nye the Science Guy has spent decades decoding scientific topics, from germs to volcanoes, for television audiences....In his new book, Nye delights in how [evolution] helps to unlock the mysteries of everything from bumblebees to human origins to our place in the universe." -National Geographic "When it comes to Bill Nye, 'Science Guy' doesn't even begin to cover it. When he's not being summoned to act as a voice of reason for news outlets or leading meetings as CEO of the Planetary Society, he is living the life of a best-selling author....His recently published book, 'Undeniable: Evolution and the Science of Creation,' enlightens readers while using a conversational, educational tone. After all, it's his ability to break down even the most complicated topics into bite-size pieces that made him such a hit on his '90s children's show 'Bill Nye, the Science Guy.'" -The Boston Globe "Mr. Nye writes briskly and accessibly...[and] makes an eloquent case for evolution."-The Wall Street Journal "Because [Bill Nye is] a scientist, he has no doubts that the 'deniers' of evolution are flat wrong. And because he's a performer, his book is fun to read and easy to absorb." -The Washington Post "Ignite your inner scientist when Nye, known for delivering geeky intel with clarity and charm, takes on one of society's most hotly debated topics (yes, still)." -Time Out New York
